FIRST TIME ⌒ EVERY TIME

INTRODUCING OPEN PLATFORM LEGAL CAPTURE AND STREAMING SOLUTIONS

High Quality Video | Secure Live Streaming | Unmatched Design and Security

Never Miss a Moment | Simple Solution | Record Securely

Bookmarks/Notes | Video and Audio Masking | CMS Integration for Metadata

Orchestrate Legal-Stream features high-definition video and audio recording from multiple cameras in 720p and 1080p HD. Advanced microphone sync and Multi-Cam with full audio support records and offers bi-directional streaming for legal meetings, interviews, digital arraignment, court procedures, and testimonies. **Legal-Stream** was designed for secure, password protected recordings and streams; all user data is captured for a full chain of custody record. If audited or challenged after the fact, the proven chain of custody methodology, SHA-2 authentication has been tried and tested in court to protect the end user. In contrast, using consumer/off the shelf products leaves you at risk and possibly inadmissible in court.

Orchestrate Legal-Stream is a Hybrid, Cloud based, and/or On-Premise based system that streamlines the recording process. **Legal-Stream's** easy functionality and simplified user interface takes control of the recording process with a single tap - no need to deal with the extra overhead associated with outdated systems.

DWS offers custom services to integrate **Orchestrate Legal-Stream** into existing backend databases, LMS, RMS, CAD, and other records systems. The **DWS** solution is designed to be flexible by integrating existing records systems to avoid duplication of interfaces and costs for personnel. The **DWS** open platform development process does not require costly uplifts to new systems or costly and time-consuming data migrations. The fully customizable data interface can be programmed to comply with the organization's data schema for compliance and records. Once configured, the solution runs automatically to index, secure, move, store, and manage digital media.

Dynamic Workflow Solutions

KEY FEATURES

⌒ LIVE STREAMING

Securely stream audio and video to any workstation client on the network. Bi-Directional Streaming for court procedure, digital arraignment, and legal procedure meetings.

⌒ INTUITIVE ORGANIZATION

Sort evidence in a way that works for you with custom metadata categories in the existing CMS, RMS, or other current data management applications.

⌒ ACCESSIBLE FROM ANYWHERE

Detectives, prosecutors, judges, child advocacy staff, and more can watch interviews securely from anywhere on the network.

⌒ VIDEO BUFFERING

Never miss a moment with ORCHESTRATE LEGAL-STREAM'S continuous buffer to capture an event even if the recorder was mistakenly not turned on.

⌒ SECURE STORAGE

Protect your interviews from tampering and false accusations.

⌒ ANNOTATE VIDEO

Easily make annotations for quick playback of key moments.

⌒ FLEXIBLE HARDWARE OPTIONS

Choose between covert or overt camera options to best fit the policies and workflow of the organization: ONVIF Compliant.

⌒ PORTABLE HARDWARE OPTIONS

Fully featured Portable Hardware Recording Options with live streaming from the field with Cellular Networking.

SPECIFICATIONS

TAMPER-PROOF TECHNOLOGY	SHA-2 hashing algorithm and chain of custody including standard reports
VIDEO ENCODING	H.264 baseline and main profile (MPEG-4 part 10/AVC), streaming compliant
CAMERA SECURITY	HTTPS encrypted communication to the camera, IEEE 802.1x network access control
SUPPORTED PROTOCOLS	IPv4/v6, FTP, CIFS/SMB, SMTP, Bonjour, UPnP, ONVIF
POE SUPPORT	Power over ethernet IEEE 802.3af/802.3at type 1
COVERT OR OVERT CAMERAS	Support for either style of camera
RUGGED	Vandal resistant
BUILT IN REDUNDANCY	Redundant recording servers, RAID 1 redundancy for OS and application
